16.6.2025

**COMMISSION REGULATION (EU) 2025/1164**

**of 13 June 2025**

**amending Annexes II and III to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for cyantraniliprole, cyflumetofen, deltamethrin, mefentrifluconazole, mepiquat and oxathiapiprolin in or on certain products**

**(Text with EEA relevance)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC <sup>(1)</sup>, and in particular Article 14(1), point (a), thereof,

Whereas:

- (1) For cyantraniliprole, cyflumetofen, deltamethrin, mefenftrifluconazole and oxathiapiprolin, maximum residue levels ('MRLs') were set in Annex II to Regulation (EC) No 396/2005. For mepiquat, MRLs were set in Part A of Annex III to that Regulation.
- (2) On 2 December 2023, the Codex Alimentarius Commission adopted a new Codex maximum residue limit (CXL) for the active substance mefenftrifluconazole in oats <sup>(2)</sup>.
- (3) On 30 November 2024, the Codex Alimentarius Commission adopted new CXLs for the active substances cyantraniliprole, cyflumetofen, deltamethrin, mefenftrifluconazole, mepiquat and oxathiapiprolin <sup>(3)</sup>.
- (4) In accordance with Article 5(3) of Regulation (EC) No 178/2002 of the European Parliament and of the Council <sup>(4)</sup>, where international standards exist or their completion is imminent, they are to be taken into consideration in the development or adaptation of food law, except where such standards or relevant parts thereof would be an ineffective or inappropriate means for the fulfilment of the legitimate objectives of the Union food law, or where there is a scientific justification, or where they would result in a different level of protection from the one determined as appropriate in the Union. Moreover, in accordance with Article 13, point (e), of that Regulation, the Union is to promote consistency between international technical standards and Union food law while ensuring that the high level of protection adopted in the Union is not reduced.
- (5) The European Food Safety Authority ('the Authority') assessed the risks that those CXLs may pose to consumers and published scientific reports <sup>(5)</sup> <sup>(6)</sup>.
- (6) The Union presented reservations <sup>(7)</sup>, <sup>(8)</sup> to the Codex Committee on Pesticides Residues on the CXL proposed for cyflumetofen in coffee beans due to the lack of metabolism studies in a representative commodity for coffee beans.
- (7) The Union also presented reservations <sup>(9)</sup> to the Codex Alimentarius Commission on the CXLs proposed for cyantraniliprole in soybeans in the group of 'dry beans (subgroup)' and in grapes due to inconsistencies in the re-treatment intervals reported in the residue trials.
- (8) The CXLs for which the Authority did not identify risks to consumers in the Union, and for which the Union did not present a reservation to the Codex Committee on Pesticides Residues or the Codex Alimentarius Commission, can be considered safe. This is the case for certain CXLs for cyantraniliprole, cyflumetofen, deltamethrin, mefenftrifluconazole, mepiquat and oxathiapiprolin. Those CXLs should therefore be included in Regulation (EC) No 396/2005, except where they relate to products which are not listed in Annex I to that Regulation or where they are at a lower level than the current MRLs for the pesticide/product combinations concerned as these were set based on authorised uses.
- (9) Based on the scientific reports of the Authority and taking into account the relevant factors listed in Article 14(2) of Regulation (EC) No 396/2005, the Commission has concluded that the modifications to the MRLs are acceptable.
- (10) Annexes II and III to Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (11) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

*Article 1*

Annexes II and III to Regulation (EC) No 396/2005 are amended in accordance with the Annex to this Regulation.

## *Article 2*

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels, 13 June 2025.

*For the Commission*

*The President*

Ursula VON DER LEYEN

***Cyflumetofen (sum of isomers)***

The European Food Safety Authority identified some information on analytical methods as unavailable. When viewing the MRL, the Commission will take into account the information referred to in the first sentence submitted by 27 January 2025, or, if that information is not submitted by that date, the lack of it.

(+) Pesticide-product combination for which a footnote exists. The list of footnotes is provided below.

***Mepiquat (sum of mepiquat and its salts, expressed as mepiquat chloride)***

The following MRL applies to oyster mushrooms: 3 mg/kg. Monitoring data show that cross-contamination of untreated cultivated fungi may occur with straw lawfully treated with mepiquat. When reviewing the MRL, the Commission will take into account the information, if it is submitted by 31 December 2030, or, if that information is not submitted by that date, the lack of it.

**0280010 Cultivated fungi'**

<sup>(\*1)</sup> Indicates lower limit of analytical determination

<sup>(1)</sup> For the complete list of products of plant and animal origin to which MRLs apply, reference should be made to Annex I

<sup>(\*2)</sup> Indicates lower limit of analytical determination
